Q) Create one form with and apply css for that

Html file:

```
<!DOCTYPEhtml>
 <html>
  <head>
   <title> First Login bro!! </title>
   <link rel="stylesheet" href="style.css">
  </head>
  <body>
  <div>
    <form>
     <h3 class="input heading"> LOGIN </h3>
     <label for="user">User ID:</label>
     <input class = "u" type = "text" id = "user" name = "user"
     placeholder = "Enter the userid"><br><br>
     <label for="user">Password:</label>
     <input class = "p" type = "text" id = "password" name = "password"
     placeholder = "Enter the password"><br><br>
     <input type = "button" value = "Submit"><br>
    </form>
   </div>
```
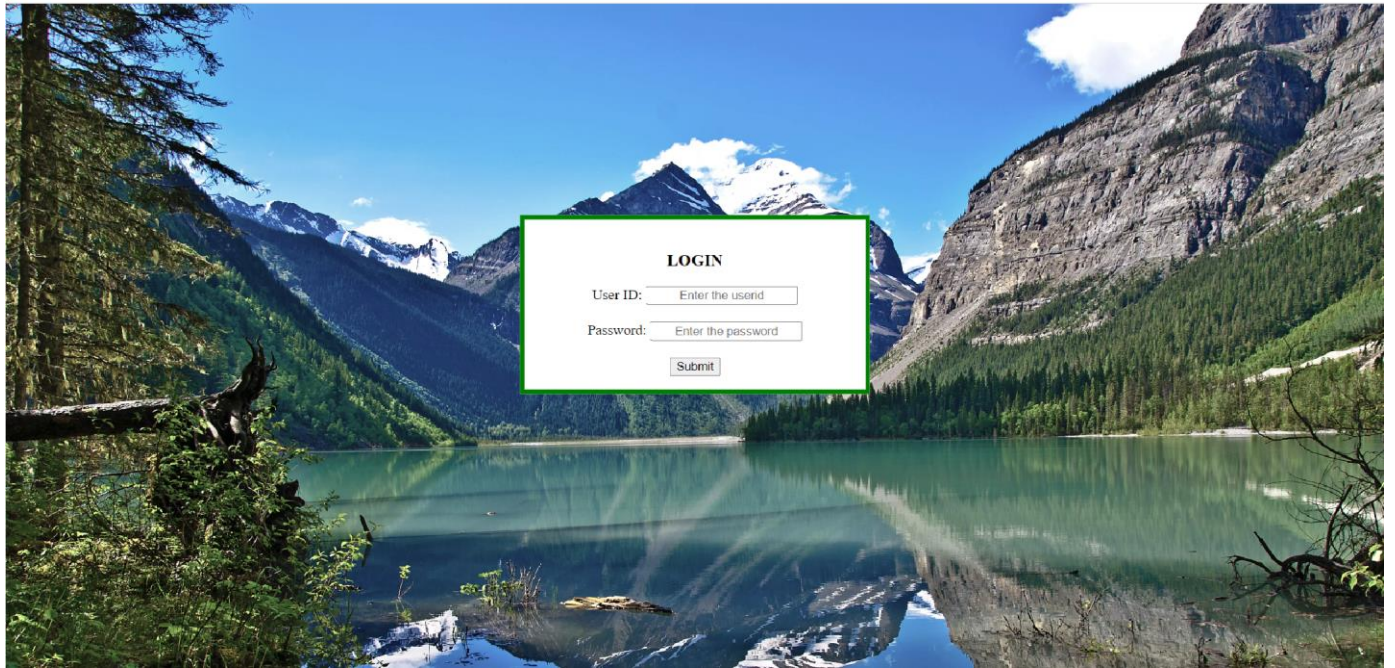

```
  </body>
 </html>
```

Css file:

```css
body {
    margin: 0; padding: 0;
    background:
    url(backgrounf.webp);
    background-size: cover;
}
div {
    text-align: center; position:
    absolute; top: 45%; left: 50%;
    background-color: white;
    transform: translate(-50%,-
    50%); width: 350px; padding:
    15px; border: 5px solid green;
}
input[type="text"] { text-
align: center;
}
```

Output:

LOGIN

User ID: [Enter the userid]

Password: [Enter the password]

[Submit]
